

ON TRACK WITH THE BV-206

Wherever you need to make tracks, make sure you do it with Camoplast. Remember, a better track always means a better track record.

BUILT BETTER TO PERFORM BETTER

- Unique treadbar pattern for better performance in snow and soft terrain
- All-rubber guide design prolongs road wheel life
- Fiberglass reinforcement rods provide flexibility and durability
- Exclusive track design delivers lower vibration and reduced noise levels*
- Lightest weight track on the market for better fuel economy
- Fits original Hagglands undercarriage
- NATO/NAMSA approved

* Independent testing has shown noise levels up to 50% lower than competitor tracks.

Camoplast Technical Specifications

PART NUMBER	WIDTH	LENGTH	WEIGHT
700-2459	620 mm	5830 mm	175 kg

Note: Other track lengths available to fit NA110, BRT87D and other vehicles.

THE CAMOPLAST ADVANTAGE

We design, develop and manufacture a complete range of specialized components, sub-systems and assemblies for world-leading original equipment manufacturers of both on and off-road vehicles. We build composite rubber tracks, components and complete undercarriage systems, composite body-dressing parts, as well as thermoplastic under-the-hood sub-systems.
